

SETTING GOALS PART VIII

Congratulations on submitting your final competition submissions! After taking a moment to have a sigh of relief, read through the What's Next Guide, and use this final worksheet to reflect on your experience in the Academy, and make a plan for the future.

You've had the chance to hear from experts from across the aerospace and commercial space industries and heard about their research, products, and roles. What opportunity, piece of advice, or career path were you most interested in? Did someone mention something that you are going to look into more or would like to pursue?

Career paths aren't always linear, and you never know where you'll end up. What about being an entrepreneur in the commercial space industry is appealing to you? What aspects are you not comfortable with yet?

After submitting your final competition submissions, reflect on the process. What would you have done differently or would like to improve on in the future?

After reading the What's Next Guide, what is next for you? If you're in high school, do you plan to enroll in college after you graduate or start working? Would you like to start your own business at some point?

How could pursuing entrepreneurship or a career in the commercial space industry fit into your future plans and goals?
